ABOUT

SLIET

Established in 1989, Sant Longowal Institute of Engineering and Technology (SLIET) embarked on a journey towards technical excellence since its inception. Institute is accredited with Grade A by NAAC. The institute awards its own Certificates, Diplomas, Undergraduate (NBA accredited) and Postgraduate degrees (approved by AICTE, New Delhi) as per multi-entry and multi-exit policy of NEP-2020. The institute has a sprawling area of 451 acres surrounded by lush green land. The campus presents a spectacle of harmony and natural beauty. SLIET provides an extensive platform through several clubs and societies for the personality development & upskilling of students.

ABOUT TECHFEST

techFEST'26
SLIET Longowal's Annual Technical Fest

**50 +
EVENT**

**10000+
FOOTFALL**

28+

YEARS LEGACY

5,00,000+

PRIZE POOL

TechFEST'25 focuses on driving sustainable development through innovation in agriculture and manufacturing. By integrating modern technology with traditional industries, the event aims to inspire student creativity, foster problem-solving, and enhance practical skills for a better, more sustainable future.

THIS YEAR'S TAGLINE

**Technology and
Sciences for
Sustainable Earth**

KRITRIM- MODEL EXHIBITION

Kritrim is a working model event where teams design and build functional prototypes that solve real-world problems using modern technology. Models must be in working condition, and teams submit a detailed report covering concept, working principle, materials, cost and applications.

HACKATHON

Hackathon is a presentation-based competition where teams develop innovative solutions for given problem statements and present them through Microsoft PowerPoint. No physical prototype is required. Success depends on creativity, originality, research depth and clarity of approach.

JUGAAD

Jugaad challenges participants to design and build innovative, practical solutions using scrap or recycled materials. The event focuses on creativity, sustainability and converting waste into useful products for real-life use.

PRIZES WORTH
₹35,000 +

BGMI

A competitive battle-royale event focused on teamwork, strategy, and quick decision-making. Teams compete to secure the highest position and maximum points through survival and eliminations

FREE FIRE

A fast-paced squad battle where players compete using strategy, coordination, and combat skills. Teams aim to outplay their opponents and achieve the best overall score.

CHESS

A strategic one-on-one mind game that tests planning, concentration, and decision-making. Players compete through multiple rounds to determine the strongest chess player.

PRIZES WORTH
₹40,000 +

PITCHVERSE

Present an innovative startup idea or prototype that solves a real-world problem, highlighting its feasibility, impact, and potential.

CASE CRACK

Analyze a given business case, identify the key problem, and present a practical and strategic solution.

BRAND BLITZ

Create and present an effective marketing strategy for a given brand or product, focusing on branding, promotion, and target audience.

CASE ETHICAL CROSSTALK

Analyze a given ethical dilemma, take a stand, and defend your decision through logical arguments while considering ethics and practicality

PRIZES WORTH
₹35,000 +

CIRCUIT CRAFT

A two-stage electronics competition beginning with a timed quiz covering analog electronics, digital logic, and circuit theory. Qualified participants proceed to a practical circuit-design and debugging challenge using either physical breadboards or approved circuit simulation software. Participants are judged on circuit functionality, accuracy, debugging skills, neatness, and time efficiency.

Digital Design Challenge

An individual HDL competition where participants solve digital design problems involving combinational logic, sequential circuits, FSMs, memory interfaces, and basic processor components. Participants can use only Verilog or VHDL and must complete the problems within a fixed time limit. Solutions are evaluated for functionality, efficiency, readability, and proper HDL design.

INNOVATION-X

A 10-12 day innovation sprint where teams identify a real-world problem and develop a functional MVP using hardware, software, IoT, AI/ML, web, mobile, or hybrid technologies. Teams are expected to build a working prototype, maintain their source code, and prepare technical documentation and a pitch. The event concludes with a 10 minute presentation followed by a 5-minute Q&A with the judging panel.

Arduino Imagino

An embedded-systems challenge where participants develop an Arduino-based solution to a student-related real-world problem provided 1-2 weeks before the event. Participants will work with sensors, embedded programming, and realtime feedback mechanisms to create their solution. Physical hardware or approved simulation software may be used depending on the event setup.

PRIZES WORTH
₹50,000 +

SOLDERING SPEEDRUN

RACE AGAINST TIME TO SOLDER A GIVEN CIRCUIT WITH SPEED, ACCURACY AND PRECISION.

BREADBOARD BATTLE

TEST YOUR ELECTRONICS KNOWLEDGE AND PRACTICAL SKILLS BY DESIGNING CIRCUITS ON BREADBOARD.

GRID MASTERS-SLD CHALLENGE

DESIGN, INTERPRET AND TROUBLESHOOT ELECTRICAL POWER SYSTEM SINGLE LINE DIAGRAMS.

WPTC-WIRELESS

DESIGN AND BUILD A WIRELESS POWER TRANSFER SYSTEM TO POWER THE GIVEN LOAD.

PRIZES WORTH
₹45,000 +

MECHNOVATE

To Developed Presenting Skills and Quality of Powerpoint Presentation Where Student Select a Real World Mechanical Problem and Present on Innovation Solution

DESIGNARE

Designer is an exploration of 3D design. Participants are challenged to craft models that blends aesthetics with functionality, fostering creativity, technical acumen, and an astute understanding of design intricacies.

HYDRALOAD

Hydraload is an application of understanding of fluid mechanics, pressure dynamics, and force distribution to engineer hydraulic systems.

FABRIQUER

Participants are thrust into a realm where theoretical knowledge meets practical application, tasked with fabricating machines that embody precision, efficiency, and ingenuity. From stamping to welding, cutting to bending, and beyond, this event celebrates the synthesis of skill and innovation.

PRIZES WORTH
₹50,000 +

CHEMI-THONE

Participant will be given an Industry-related problem and must submit innovative solutions the same day. Shortlisted teams will present their ideas the next day, judged on technical depth, feasibility and presentation clarity.

SOAP MAKING

A fusion of science and art, creating aromatic symphonies. Discover quality control secrets in this sensory realm of soap.

JAM SESSION

A platform for eloquent wordplay, igniting the art of communication. Assert your voice in the arena of chemical dialogue.

CHEMI-MYSTERY

An exploration of chemical enigmas through a tri-round quest, challenging knowledge, stimulating curiosity, and enhancing chemistry comprehension. Solve mysteries, one query at a time.

CHEMI CRAFT

Participants will orchestrate a sequence of chemical reactions. Judged on creativity, safety and clarity of explanation.

POSTER AND PAPER PRESENTATION

Present your smart ideas, solutions and innovations using chemical engineering principles to solve real world problems. Judged on Innovation, clarity and practical applicability.

PRIZES WORTH
₹40,000 +

TRUSS LOAD

The weight/force that a truss structure is designed to carry and transfer the load. The test of how efficiently your design transfers force from load point to supports using minimum material.

CITY MODEL EXHIBITION

Design and build a 3D miniature model of sustainable smart city. To show how technology, environment planning can create a better future city.

SEISMIC CHALLENGE

In this a small scale structural model that can withstand simulated earthquake forces on a shake table with minimum damage in the model. To apply concept of earthquake resistant design using limited material and budget.

CAD DESIGN CHALLENGE

It is a software developed by Autodesk used for 2D drafting and 3D modeling. It helps to convert ideas into technical drawings.

TECHNICAL QUIZ COMPETITION

The Civil Engineering Quiz is designed to test not just the rote theoretical knowledge of the students, but their practical observation skills and ability to think under pressure.

POSTER PRESENTATION

The event aims to provide students with a structured academic platform to identify, investigate, and present innovative ideas, technical concepts, research findings, and emerging developments in the field of Civil Engineering through professional paper and poster presentations.

PRIZES WORTH
₹30,000 +

TECHNO-VATION

We provide various problem statements, and students will be required to identify the underlying problems and develop innovative solutions.

Students will present their proposed solutions during the event.

SM-Agri

Interested students will register for the event and visit agricultural farms facilitated by the IIC to identify real-world problems or gaps between agriculture and technology.

-Students will develop technology-based solutions to the identified problems and present their ideas during the Event.

COGNITIVE CHALLENGES

The event will include various games, puzzles, and challenges designed to test students' cognitive thinking, logical reasoning, and problem-solving abilities.

The challenges will be revealed during the event, and students will be required to analyze and solve them on the spot.

PRIZES WORTH
₹25,000 +

FOOD-O-CRATS

techFEST '26
SLIET Longowal's Annual Technical Fest

FOOD FORGE

Participants develop an innovative food product using randomly provided ingredients and explain its preparation, nutrition, packaging, target consumers, USP and marketing strategy.

FOOD FORENSICS

A two-round event where participants first identify food samples through sensory characteristics and then detect adulterants using food-testing methods and explain the results.

CLUE CRAZE

A campus treasure hunt in which teams solve clues, puzzles and QR-code challenges at different checkpoints, testing teamwork, logical thinking, observation and problem-solving.

FOODPRINT

Participants identify popular food and beverage brands from taglines, logos, product images, blurred pictures or advertisements within a limited time.

TECH4EARTH

A knowledge-based quiz covering sustainability, environmental science, renewable energy, climate change, green technology, food technology, AI, space science and recent scientific developments.

PRIZES WORTH
₹40,000 +

THE BIG BULL (DIPLOMA STUDENTS ONLY)

ICD students answer questions and manage virtual coins, testing their teamwork, decision-making, and risk-taking skills to score the highest. Awards for the highest scorers.

AQUA CLEAN

Craft-Filter and Transform, turn dirty water into crystal clear with limited materials.

SPLASH ROCKET

Design and launch a water-powered rocket in a two-round engineering challenge. Test creativity, precision, and building skills under pressure. Top performances will be recognized.

AEROSTRIKE

Design a paper plane using Aerodynamic principles for maximum distance and Flight precision.

QUIZ NOVA

Test knowledge, analytical thinking, observation, and logical reasoning in an individual written challenge. Showcase quick thinking and problem-solving under pressure.

PRIZES WORTH
₹25,000 +

ROBOWAR

Design and build a robot for head-to-head combat, using offensive and defensive capabilities to outmaneuver, disable, or defeat the opponent.

RAPID LINE

Design and race a fully autonomous Line Follower Robot to navigate a pre-laid track with turns, gaps, and surface variations in the shortest time.

SKY MANEUVER

Design and manually pilot a quadcopter through an obstacle course, execute a precision payload drop, and demonstrate stable hovering without GPS or autonomous flight.

HOVERMANIA

Design and build a remote-controlled hovercraft that floats through a given trackway, navigating turns, junctions, and terrains without excessive sway.

ROBOSOCCER

Build a soccer-playing robot to dribble, defend, and score in a fast-paced 1v1 robotic showdown that blends precision, strategy, and speed.

RC BOAT

Design and build a wirelessly controlled, battery-powered boat to navigate a waterbased obstacle course with speed, stability, and maneuverability.

RC CAR

Design and manually operate a remote-controlled car to complete a dynamic obstacle course in the shortest time, testing speed, handling, and maneuvering.

MICROMOUSE CHALLENGE

Design, build, and program a fully autonomous "Micromouse" robot to explore, map, and solve an unknown maze from start to centre in minimum time.

PRIZES WORTH
₹2,00,000 +

COMPETITIVE PROGRAMMING MARATHON

The CP Marathon is an intense, endurance-based competitive programming event designed for algorithm enthusiasts. It plunges participants into the thrill of the solve, testing their ability to think analytically and mathematically under extended pressure.

GHOST CODE

Ghost Code is a reverse-engineering challenge where you decode someone else's logic. Participants are given broken or mysterious code and must figure out what it does — or should do. It tests debugging, pattern recognition, and analytical skills under pressure. Think of it as digital detective work for coders.

PIXEL WIZARD

Pixel Wizard is about creating website clones using specific tech stacks. It's a test of your coding, creativity, and design skills.

Machine Learning Model

Ghost Code is a reverse-engineering challenge where you decode someone else's logic. Participants are given broken or mysterious code and must figure out what it does — or should do. It tests debugging, pattern recognition, and analytical skills under pressure. Think of it as digital detective work for coders.

DEBUG & DEPLOY (DIPLOMA STUDENTS ONLY)

In Debug & Deploy, participants will tackle real-time coding issues and deploy solutions on the spot. From logical bugs to syntax errors, this event simulates the challenges faced in real-world software development. You'll need precision, speed, and a cool head to fix problems efficiently. It's a thrilling race to turn broken code into running success.

AI CHIT - CHAT

AI Chit Chat a competition to build chatbots using AI models. Use AI models to craft digital companions that interact meaningfully and enrich user experiences.

PRIZES WORTH
₹50,000 +

Participation Fee EARLY BIRD OFFER

1. Without Accommodation

₹ 299/- (per participant)

Includes:

- Access to all techFEST'25 events
- Participation certificate

2. With Accommodation

₹ 599/- (per participant)

Includes:

- Access to all techFEST'25 events
- Hostel Accommodation (Extra Meal charges @50/Diet)
- Participation certificate

Note :

- Registration is mandatory for participation.
- Fee once paid is non-refundable.
